# FastClass®

## Apply Correct Classifications Every Time

### RIGHT CLASSIFICATION DRIVES ACCURATE QUOTES

Less than truckload (LTL) freight shipping classification (class), established by the National Motor Freight Traffic Association (NMFTA), is crucial for accurate LTL price quotes and transportation costing.

FastClass streamlines the classification process, by giving users instant, online access to the National Motor Freight Classification (NMFC)* data.

### THE FASTCLASS ADVANTAGE

**Accurate Bills Of Lading**
Understand and apply freight commodity class, sub-class, and NMFC item number to minimize carrier reclassification risk and invoice surprises.

**Improved Transportation Planning**
Receive accurate rate quotes and make better cost estimations with correct classification.

**Data Reliability**
Confidently use FastClass with the assurance of timely, automated data updates that coincide with each NMFC supplement release. Data is also available as raw classification data for use in custom development projects.
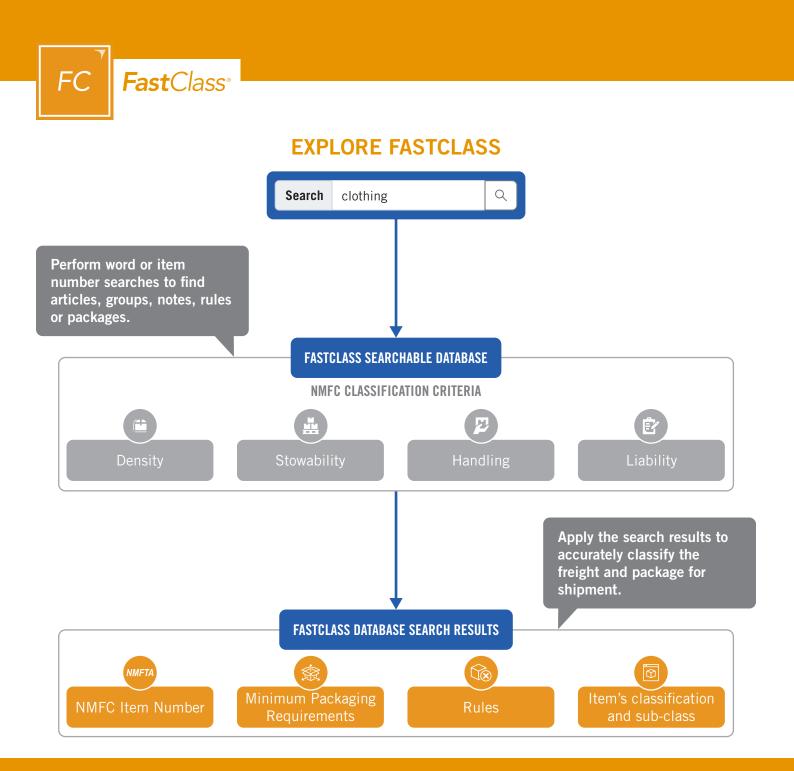

**Minimized Damages**
Mitigate damage claims and financial impact by packaging freight according to standards.

**User Friendly Tools**
Take advantage of easy-to-use functionality; powerful search, bookmarking, export, print options, quick view of articles, rules and packages changed in any NMFC data supplement and a simple density calculator to calculate densities for freight tender.
